

ADUWAOSA

Growing Resources. Building Value.

COMPANY PROFILE

Building a disciplined Nigerian agro-industrial platform

Koko, Delta State, Nigeria

2026

Company Overview

ADUWAOSA AGRO ALLIED COMPANY LIMITED is a Nigerian agro-industrial company based in Koko, Delta State, focused on developing agricultural resources and processing capability into useful products and long-term enterprise value. The company's current commercial focus is bulk Palm Kernel Oil (PKO) for Nigerian business and industrial customers.

ADUWAOSA combines a physical production and storage foundation with clear commercial processes, product traceability and a long-term growth vision across agriculture and agro-allied activities. The company is building relationships with customers, suppliers and partners through practical service, transparent product information and responsible growth.

Company at a glance

Our approach

Clear product information. Practical quality controls. Transparent commercial terms. Responsible long-term growth.

Building for the long term

Palm Kernel Oil is the starting point of a broader growth journey. Over time, ADUWAOSA aims to expand its productive base across selected agricultural and agro-allied activities while keeping commercial discipline, customer value and sustainable growth at the centre of each step.

02
OUR DIRECTION

Vision, Purpose & Values

Vision

To build ADUWAOSA into a trusted integrated agro-industrial company that transforms agricultural resources into dependable products and long-term industrial value.

Purpose

To develop agricultural resources and processing capability into useful industrial products and long-term enterprise value.

Mission

To responsibly source, process and develop agro-industrial products, beginning with Palm Kernel Oil, while building the systems, partnerships and productive assets required for commercially justified value-chain integration.

Core values

VALUE	WHAT IT MEANS IN PRACTICE
Integrity	Communicate clearly, act transparently and honour commitments.
Quality Discipline	Support product quality through documented processes, traceability and evidence-based improvement.
Accountability	Take responsibility for products, processes, service commitments and outcomes.
Customer Trust	Build lasting confidence through clarity, responsiveness and professional service.
Responsible Growth	Grow carefully, strengthening capability and value creation as new opportunities develop.

Our guiding principle

Grow resources. Build systems. Create value. Earn trust. Expand responsibly.

Current Commercial Focus

Palm Kernel Oil is ADUWAOSA's first commercial product and a key starting point in the company's agro-industrial growth journey. The current offer serves business and industrial buyers whose intended applications align with the available product characteristics and quality information.

Who we serve

- Laundry soap and liquid detergent manufacturers.
- Selected cosmetics and skincare businesses where product fit is confirmed.
- Qualified surfactant and chemical blenders with defined technical requirements.

ADUWAOSA works with buyers to understand the intended application and relevant product requirements before supply, helping ensure that the product offered is appropriate for the intended use.

Current laboratory-tested baseline

PARAMETER	CURRENT RESULT	REFERENCE
Free Fatty Acid (FFA)	5.0%	Current tested sample result.
Moisture & Impurities (M&I)	0.4%	Current tested sample result.
Iodine Value (IV)	18	Current tested sample result.
Saponification Value (SV)	245	Current tested sample result.
Colour (5.25" Lovibond)	5.5–6.5 Red / 50 Yellow	Current tested sample result in the stated test context.

Laboratory reference

The values shown above are taken from the current laboratory-tested sample. Where buyers require batch-specific quality documentation, this is confirmed as part of the order process.

04

WORKING WITH ADUWAOSA

A Clear Buyer Process

ADUWAOSA keeps the buying process clear and straightforward, helping customers understand product fit, quantity, payment, collection and documentation before supply.

STANDARD MOQ 25 litres	COMMERCIAL QUANTITY Quoted in litres
PAYMENT 100% cleared payment before loading	COLLECTION Factory Gate Pickup — Koko, Delta State
CONTAINERS Normally buyer-supplied	CURRENT PRICE Quoted per transaction — request current price

The standard minimum order quantity is 25 litres. Smaller quantities may be considered for selected trials, evaluations or special requirements.

Typical buyer journey

1 Qualify	2 Sample / Trial	3 Quote	4 Payment	5 Container Check	6 Load / Dispatch	7 Follow Up
---------------------	----------------------------	-------------------	---------------------	-----------------------------	-----------------------------	-----------------------

Containers and collection

- Buyers may provide suitable kegs or drums, including 25-litre kegs, for confirmed orders.
- IBCs and mini-tankers may also be used where they are suitable, clean, dry and compatible with the product.
- Under the standard factory-gate model, buyers arrange and pay for outbound transportation from Koko, Delta State.
- Loading is completed after payment confirmation and container checks.

Product Confidence & Documentation

ADUWAOSA supports buyer confidence through product traceability, retained samples, production records and appropriate laboratory verification. These controls help the company maintain clear product information and respond effectively when buyers require quality evidence or issue investigation.

How product confidence is supported

- A labelled control sample is retained from each production batch for reference and issue investigation.
- Each production batch is identified with a traceability code in the format ADW-PKO-YYMM-###.
- Batch records connect raw-material source, production information, available quality information, quantity and dispatch records.
- External laboratory verification is carried out periodically and when product, customer, process or applicable compliance requirements make additional testing appropriate.
- Customer-facing commercial quantities are recorded in litres, with supporting weight records maintained where they form part of the dispatch process.

What the current COA means

Understanding the current COA

The current Certificate of Analysis supports the laboratory results shown for the tested sample. Where a buyer requires batch-specific documentation, the applicable quality records are confirmed during the order process.

Clear quality communication

Product and quality information shared with buyers is based on the records applicable to the product or batch being discussed. Batch-specific certificates are provided only where the relevant batch has been tested and documented.

From Order to Collection

ADUWAOSA operates from a physical production and storage foundation in Koko, Delta State. Its fulfilment process is structured around clear order confirmation, payment verification, suitable containers, controlled loading and traceable dispatch records.

Our operational base

- A physical production facility and storage infrastructure support the company's current PKO operations.
- Installed processing machinery supports the company's Palm Kernel Oil production focus.
- Supply commitments are aligned with confirmed product availability and the requirements of each order.

Order fulfilment process

- Order details - including product, quantity, price, collection arrangement and required documentation - are confirmed before loading.
- Buyer-supplied containers are checked for cleanliness, dryness and suitability before filling or loading.
- Payment is confirmed before the product is released for loading.
- Dispatch records connect the supplied quantity in litres with the relevant customer and batch reference.

Factory-gate model

Koko, Delta State

The standard commercial model is Factory Gate Pickup. Buyers arrange and pay for outbound transportation, while ADUWAOSA prepares the confirmed order for loading after payment and container checks.

PALM RESOURCE DEVELOPMENT

Building a Stronger Agricultural Base

ADUWAOSA is developing its own palm plantation as part of its long-term agricultural resource strategy. Currently approximately 15 months into development, the plantation represents a future opportunity to strengthen the company's raw-material base as it matures.

Current raw-material sourcing

ADUWAOSA's current PKO operations use externally sourced palm kernels. Source information is recorded as part of the company's traceability and supplier-management approach.

Long-term opportunity

As the plantation matures, it may provide ADUWAOSA with stronger raw-material control and greater participation across the palm value chain, supporting the company's longer-term integration goals.

TODAY

Externally sourced palm kernels support current PKO operations.

FUTURE

The developing plantation may strengthen ADUWAOSA's raw-material base as it matures.

Long-term integration

The plantation reflects ADUWAOSA's long-term commitment to building stronger links between agricultural resources and agro-industrial value creation.

08

FUTURE GROWTH

Expanding Across Agriculture

ADUWAOSA's long-term growth vision extends beyond Palm Kernel Oil. As the company develops, it plans to expand progressively into selected agricultural and agro-allied activities that complement its broader resource and value-creation strategy.

Livestock Production

- Goat production
- Pig production

Poultry Production

- Commercial broiler production
- Commercial layer / egg production

Aquaculture

- Fish farming / aquaculture

Specialty Farming

- Snail farming

Building a broader agro-allied platform

These planned growth areas are intended to broaden ADUWAOSA's productive base, create new opportunities across agriculture and strengthen the company's long-term position as an integrated agro-allied enterprise. They remain future growth areas and are not yet part of current commercial operations.

A connected growth vision

These planned activities reflect ADUWAOSA's goal of building a diversified agricultural and agro-industrial business under one strong corporate identity.

Buyer & Partner Value

ADUWAOSA aims to make business straightforward for buyers and partners who value clear product information, transparent commercial terms, traceability and professional fulfilment.

What buyers and partners can expect

- Clear product information aligned with the intended application.
- Samples or trial quantities where appropriate to the buyer's evaluation process.
- Current pricing provided through a formal quotation for each transaction.
- A standard 25-litre minimum order quantity, with smaller quantities considered for selected trials or special requirements.
- Clear factory-gate collection and payment-before-loading terms.
- Batch traceability, retained samples and relevant quality documentation.
- Responsive communication, follow-up and professional issue handling.

Growing Resources. Building Value.

ADUWAOSA's long-term ambition is to create broader agro-industrial value by strengthening agricultural resources, productive capability, customer relationships and responsible expansion.

Product availability and batch-specific documentation are confirmed as part of the quotation and order process.
